

BACK TO THE FUTURE: HOW TECHNOLOGY IMPROVES FUNCTIONING OF PERSONS WITH DISABILITY

- Lecture by KD. Dr. med Inge Eriks-Hoogland, PhD and Daniel Joggi
- Saturday 13:30-14:30 Biozentrum
- Description:

New developments in wheelchair design, introduction of robotics in therapy and spinal cord stimulation to improve functioning has changed rehabilitation of persons with disability the last decade significantly. In this lecture we will give an overview of current application of technology in rehabilitation and what it means for the patients.
